Client Testimonials

"We own one of the only two SAP IS-U systems in Singapore. NEC was able to provide excellent application maintenance support. We are impressed by the team's technical expertise and the flexibility of their service offerings."

Vice President, IT
Tuas Power

"After NEC deployed an ERP system for us, the difference has been remarkable. With an integrated system, we now have true visibility of our day-to-day operations. This has improved our business agility, raised our operational efficiency and increased overall productivity levels."

Assistant Finance Manager
Superworld

"With the existing scale of our business and the speed at which we are growing, constantly finding new and better ways to get things done is not an option, but a critical necessity. SAP ECC 6.0 coupled with NEC's depth of experience in tailoring and implementing SAP solutions saw us enjoying dramatic improvements in almost every area of our operations. This is especially true in our business processes which are now simpler and faster, and the precise real-time information greatly enhances our decision-making."

CEO, Founder and President
Omni United

"We are very satisfied with the ERP solution that NEC implemented for us, and the results that it has delivered. With the centralised system, we have a better overview of our customers, brands-under-representation and inventory management is more accurate and less time-consuming. NEC also provided excellent cost effective support and maintenance for us."

Group IT Manager
Luxasia

"We had an existing ERP solution. The NEC team was able to customise it to fit our business needs perfectly, and did so in a prompt and professional manner. Good job!"

Chief Operating Officer
IH Digital

Enabling Organisation-Wide Efficiency

NEC leverages technology in innovative ways to deliver greater efficiency to organisations of all natures and sizes. In understanding society's growing demands, we are proud that, with our experience and expertise, we are able to help customers around the world work smarter and more productively.

VALUES FOR SOCIETY :

Safety | Security | Efficiency | Equality

Towards an abundant society for all people to live happier and more prosperous lives
NEC is more than cutting edge technologies that meet business demands. We are also committed to generating social value, revolving fundamental issues of society and our customer, through the development of higher-level ICT assets that are ahead of their time. Our solutions for society focus on four core social values: Safety, Security, Efficiency and Equality. By working with commercial organisations and government institutions, we identify issues, develop solutions and resolve social problems from a global angle, becoming the partner that our customers – and the world – can depend on.

# Enterprise Resource Planning Solutions

The Brief:

To help organisations of every size achieve greater operational efficiency and enable better decision-making with full visibility and real-time insights.

The Solution:

Enterprise Resource Planning by NEC — reinforcing organisational governance, compliance and fundamentals by streamlining and integrating operations while offering enhanced modular functions for truly affordable scalability.

This is **appreciating, anticipating** and **actualising** our client's needs.

Logistics

An ERP solution is regarded as the backbone of an organisation for good reason. It builds greater efficiency into daily operations and supports more effective management with 360° visibility. And with NEC, you are assured that it will fit perfectly into your business context.

We believe in sharing our expertise with all our clients, no matter how large or small they may be. By appreciating, anticipating and actualising their needs, we have taken a different approach to designing our ERP solutions. Moving away from all-encompassing systems that work for some clients but not others, we have gone modular with a suite of functional packages that can be integrated with your core ERP system. With the flexibility of deploying only the modules you need now and the option of adding new ones as your business grows and changes, you can be assured that an NEC ERP solution will always work optimally for you.

A flexible solution for every organisation

Our tiered approach is versatile enough to cater to organisations of any size, from local SMEs to global enterprises. Even different products and interfaces can be integrated into a seamless solution made for you.

Built-in cost efficiency

NEC ERP solutions are designed to give you freedom of choice. Tailored to your needs with different business model options, you benefit from the cost efficiency of paying for only what you need.

Lasting business benefits

Our pre-implementation groundwork ensures that you enjoy lower operational costs and faster time-to-market. Post-implementation agility is also achievable with fully reconfigurable systems that can grow with your organisation.

Specialising in niche needs

Based on our industry expertise, we have specific modules to meet specific needs. These include our property management solution suite that helps you effectively manage property and assets through its lifecycle from acquisition to utilisation and maintenance.

A business-driven approach to IT

Our long-term view of your success begins with pre-sales consultancy, solution development and project implementation and extends to maintenance and support with our scalable IT infrastructure services.

World-class services, worldwide excellence

With our track record of successful project delivery, decades of experience and a network of global partners, you can trust NEC to deliver services and solutions that are quality guaranteed.

Deeper Insights, Greater Foresight

Simplify management by integrating operations across functions and regions into a single, centralised system

Our ERP Solution **integrates, optimises and even automates** business processes ranging from financial and HR management to operations, corporate services and more. This improves forecasting accuracy, reduces inefficiencies and increases productivity while ensuring more robust financial reporting and greater compliance with regulations and accounting standards.

It creates a **single data source** for valuable corporate data, enabling easy access to critical business information and delivering a clear, global view of the business.

Strengthening The Supply Chain

Improve your bottom-line with lower procurement costs and streamlined processes

Achieve accelerated processing times and greater alignment with customer demands with our **Supply Chain Management module**. It streamlines sourcing and procurement processes and provides a centralised buying model that minimises unauthorised and unnecessary expenses.

In addition, it serves as a platform for collaborative supplier relationships, creating opportunities to achieve greater procurement efficiency.

NEC ERP SOLUTIONS

Enhancing Customer Relationships

Improve your marketing, sales and service operations for greater customer satisfaction

With our **Customer Relationship Management module**, you can look forward to a complete and holistic view of your customers' needs. Designed to help you effectively manage all aspects of your customer relationships, this module is built with the functionality that you need to improve and align your marketing, sales and service operations.

Optimising Operations & Resources

Maximise the lifetime value of your physical assets

Our **Enterprise Asset Management module** is designed to optimise the lifecycle management of all your physical assets like plants, equipment and facilities.

Optimise resource allocation for improved service delivery

Our **Workforce Management module** offers greater return on personnel investment. In particular, our **Field Service Management module** helps you optimally plan, schedule and dispatch your mobile service team and necessary resources so as to deliver on service commitments in a cost-efficient manner.

Manage corporate real estate with efficiency and transparency

Our **Facilities Management module** ensures that organisations with real estate assets are well supported. With shared resources management capabilities, it simplifies facilities bookings and other operational processes for greater overall efficiency.

Other key modules like Enterprise Asset Management, Supply Chain Management and Financial Management are also available individually or packaged as part of our property management solution suite.
