

NEC's Avaloq Wealth Management Implementation Services

Accelerating Financial Transformation
From Modernisation to Business Outcomes

NEC brings together Avaloq capabilities, financial-services expertise, engineering strength and regional execution to help wealth management institutions create greater value from their platform investments.

NEC's Avaloq Wealth Management Implementation Services

How can Avaloq implementation accelerate your private banking transformation?

Grow

Build for Business Growth

Serve

Enable Better Client Journeys

Scale

Scale Capabilities Across Markets

Adapt

Evolve Through Continuous Change

The Opportunity for Private Banks

Leading private banks are not simply replacing technology. They are transforming their core platforms to create a stronger foundation for growth, better client and advisor experiences, operational efficiency and continuous innovation.

Build a Strong Business-Ready Foundation

Align business processes, products, operating models and technology to build a scalable Avaloq foundation for growth and change.

Connect the Wealth Management Ecosystem

Integrate Avaloq with channels, CRM, data, payments, market infrastructure and surrounding applications.

Accelerate Market & Business Expansion

Enable new products, entities and markets through a scalable implementation approach, reusable capabilities & responsible AI.

Keep Transformation Moving After Go-Live

Support upgrades, testing, optimization and continuous change to sustain value throughout the Avaloq lifecycle.

Connected Capability Across the Avaloq Lifecycle

From assessment and transformation through implementation, migration, integration, go-live and evolution, NEC combines Avaloq implementation and application services with infrastructure capabilities for an integrated end-to-end delivery model.

Assess > Transform > Implement > Migrate > Integrate > Go Live > Run > Evolve

Transform: Define the target state, operating model and roadmap. Align business priorities, technology and transformation objectives before delivery.

Implement & Transition: Configure, integrate, migrate and test the target environment, with disciplined planning and transition through to production.

Modernize: Extend Avaloq with cloud and SaaS, digital journeys, data, analytics, automation, AI and enterprise integration.

Run & Evolve: Keep the platform reliable, current and valuable through application support, releases, upgrades, optimization and continuous change.

Why work with NEC ?

1. Regional Experience:

Successful Avaloq implementation work completed in Japan.

2. Avaloq Implementation & Support Experience: NEC supports Avaloq projects across Asia through the Avaloq ecosystem, including functional release upgrades and day to day operational support from Singapore

One partner across Avaloq implementation, application services and infrastructure.

Wealth Management & Avaloq Expertise

Combine Avaloq expertise with a broader understanding of private banking, wealth management processes and the platform technology environment.

Regional Execution

Singapore-led governance connecting NEC affiliates, specialist capability, partners and delivery resources around client priorities.

Engineering Connections that Create Value

Combine Avaloq implementation and application expertise with NEC's broader enterprise technology and infrastructure capabilities.

Continuity at Scale

Create continuity from decisions to delivery and beyond so the platform remains reliable, relevant and ready for what comes next.

Leadership Perspective

// Wealth Management is entering a new phase where technology must do more than modernize the platform. It must enable better client experiences, stronger operational resilience and continuous business change. NEC is bringing together Avaloq expertise, financial-services technology and regional delivery capabilities to help institutions turn transformation into sustainable business outcomes. //

Michio Kotegawa

Senior Vice President, FSBU, NEC APAC

Client & Market Perspective

// Our focus is to help wealth management institutions turn platform transformation into measurable business outcomes. By combining Avaloq capabilities with NEC's financial services expertise, engineering strength and APAC delivery network, we provide a practical path from transformation and implementation through to continuous evolution. //

Prashant

Director, Business Development, FSBU, NEC APAC
